FULL STACK SOFTWARE ENGINEER | REACT & NODE.JS DEVELOPER | WEB APPLICATIONS

Full Stack Software Engineer with hands-on experience delivering **production-ready web solutions** for SMEs, combining **frontend development, backend processing, REST API integrations, CMS implementation, and deployment**. Strong foundation in **JavaScript, HTML, CSS, PHP, REST APIs, database-backed workflows, and modern UI practices**, with additional training in **React, Node.js, Express.js, MongoDB, and PostgreSQL**. Proven impact automating **commercial workflows**, including a **real-time quoting system** that reduced quote generation from **15 minutes to under 3 minutes** and automated **84–120 monthly requests**, while improving **performance scores from 45 to 88+** and reducing **load times from 4.8s to 1.9s**.

PROFESSIONAL EXPERIENCE

BQS Greentech Clúster

Full Stack Software Engineer

Nov 2024 – Present

Delivering end-to-end web solutions for national and international SMEs, combining **React-based frontend development, Node.js/Express.js backend processing, CMS implementation, REST API integrations, SEO optimization**, and direct client collaboration to improve digital presence and business acquisition.

- **Developed and deployed 6+ production-ready websites and e-commerce solutions** using **HTML, CSS, JavaScript, PHP, WordPress, MySQL, and hosting configuration**, increasing **organic traffic by 37% in 4 months** and expanding indexed pages from **15 to 70+..**
- **Engineered a real-time quoting system** with **React, asynchronous JavaScript, Node.js, Express.js, PHP, REST APIs, and backend validation**, reducing quote generation time from **15 minutes to under 3 minutes** and automating **84–120 monthly commercial requests**.
- **Improved Lighthouse/PageSpeed performance scores from 45 to 88+** and reduced average load times from **4.8s to 1.9s** by optimizing **React components, assets, page structure, responsive layouts, and frontend rendering** across client websites.
- **Built backend processing and data-validation workflows** with **Node.js, Express.js, PHP, JavaScript, and REST APIs**, reducing malformed or incomplete lead submissions from **18% to 0%** and blocking **200 invalid attempts per month** across **8 critical forms**.
- **Managed requirements gathering, prototyping, development, deployment, documentation, and change control** across **6 end-to-end client projects**, achieving **90%+ on-time delivery** through **3–4 iterative review cycles per project**.

PROFESSIONAL SKILLS

Frontend Development: React | JavaScript | ES6 | TypeScript | HTML | CSS | Responsive Design | Accessibility | UI/UX | Tailwind CSS | Material UI | Vue.js | Next.js | Vite | Redux | Sass | Bootstrap | jQuery | Webpack

Backend & APIs: Node.js | Express.js | REST APIs | API Integration | PHP | Python | C# | .NET | GraphQL | Microservices

Databases: MongoDB | PostgreSQL | MySQL | SQL | SQL Server

Testing & Quality: Playwright | Cypress | Jest | Testing Library | Automated Testing | Unit Testing | Cross-Browser Compatibility | Performance Optimization | Clean Code

Cloud, DevOps & Tools: Git | GitHub | CI/CD | Azure | Linux | DevOps | Jira | Confluence | Figma

Methods & Collaboration: Agile | Scrum | Kanban | Requirements Gathering | Documentation | Client Communication | Cross-Functional Collaboration | Problem-Solving | Ownership | Adaptability | Attention to Detail

LANGUAGES

English (C1) | Spanish (native)

EDUCATION

Bachelor’s Degree in Software Development – Brigham Young University–Idaho, United States	 2025
Associate Degree in Software Development – Brigham Young University–Idaho, US	 2023
Systems Engineering – Universidad Bicentenario de Aragua, Venezuela	 2022
